Regarding claims 1, 9 and 10

Document 1 (example 4) describes healthful feed for livestock with *Grifola frondosa* extract added thereto. Document 2 (see example 2) describes feeding *Grifola frondosa* powder at a rate of 60-525mg a day per 1kg horse weight. These descriptions are found to disclose adding *Grifola frondosa* to feed promotes animal health. If animals are healthy, it is highly probable that the growth rate will increase. A party skilled in the art could easily conceive of using the health food of document 1 for livestock meets.

Regarding claims 2 and 3

Document 3 describes a method of producing *Grifola frondosa* extract as limited in claims 2 and 3. Therefore, these claims do not appear to involve an inventive step based on documents 1 and 2, and document 3.

Regarding claims 4-7

Document 4 describes adding a dried yeast cell wall to feed. Therefore, these claims do not appear to involve an inventive step based on documents 1 and 2, and document 4. The mixing ratio of a dried yeast cell wall and *Grifola frondosa* extract is a matter of design to be accordingly set by a party skilled in the art. In addition, document 5 describes adding yeast to feed.

Regarding claims 8 and 11

Chickens, pigs and cows are typical livestock and it would be easy for a party to have chickens, pigs and cows as subjects of the healthful feed for livestock described in document 1.
